HC

March 25, Tuesday night

6:00 pm - Dr. Kariya is first to observe emergent situation. He writes, "Breathing tenuous, pulse oximetry down...Patient remains tenuous and son remains unrealistic. No new suggestions."

- Isn't Dr. Kariya obligated to "suggest" intubation or tracheotomy for the tenuous breathing? Instead, Dr. Kariya disappears. Can he do that?

Patient abandonment

Dr. Kariya finds full-code patient in respiratory distress.

He documents irreconcilable difference with family, yet fails to provide needed life-sustaining treatment, or to withhold it as medically ineffective pursuant to [state law](#) and [hospital policy](#). He simply walks away!
