

March 26, Wednesday, late afternoon

Falsified record

Dr. Shamim writes "Called Dr. Kariya" when in truth he handed patient off to Dr. Weiner - of whom there is no record. Dr. Weiner refused my plea for intubation, telling me that my father was "dead the day he got here" as the two of them walked away. Can the doctors really get away with this?

Full-code patient in acute respiratory distress. ICU consult and ABG test suggest intubation was considered. What became of the test and the consult? No **nursing notes** of substance. Why wasn't patient intubated? Can the hospital really get away with this?

Why are final 3 pages of physician progress notes missing the hospital identification stamp? Were they rewritten to hide Dr. Weiner's presence on March 26 and to cover up the withholding of treatment?

Newlander; Israel.

Patient abandonment

Dr. Weiner's presence and his abandonment of my father confirmed by trial testimony. **Dr. Shamim admits** to handing over all care to Dr. Weiner.
